

MUHAMMAD IZZUDDIN

Senior Mobile Apps Engineer

Indonesia | izzuddin.m012@gmail.com | +62-858-5558-0190 | [LinkedIn](#) / [GitHub](#)

PROFESSIONAL SUMMARY

Senior Mobile Apps Engineer with 10+ years of experience building scalable, high-performance mobile applications across iOS and Flutter. Strong expertise in system architecture, operational workflows, and performance optimization within e-commerce and logistics domains.

CORE SKILLS

Mobile	: Flutter, Swift, Objective-C
Architecture	: Clean Architecture, MVVM, BLoC
Backend	: REST APIs, Laravel, JWT
Tools	: Git, Docker, Firebase, CI/CD
Systems	: Push Notifications, Background Services, QR/Barcode

PROFESSIONAL EXPERIENCE

Senior Mobile Apps Engineer (Flutter)

Allofresh | 2022 – 2026

- Core contributor to Flutter applications supporting midmile and lastmile operations
- Member of Flutter Core Team, defining architecture standards and shared modules
- Built scalable features for store operations (tasking, packing, delivery flows)
- Improved workflow efficiency for warehouse/store users
- Resolved duplicate API requests and state inconsistency issues
- Enhanced logging, monitoring, and debugging capabilities
- Supported high-frequency operational usage with stable app performance

Senior Mobile Apps Engineer (iOS Native, Flutter)

Bukalapak | 2016 – 2022

- Developed large-scale iOS applications serving millions of users
- Member of iOS Core Team maintaining shared modules and engineering standards
- Enhanced seller experience including product and order workflows
- Built and maintained virtual product systems (digital goods, top-ups)
- Migrated legacy Objective-C codebases into Swift
- Improved app performance and reduced crash rates

KEY ACHIEVEMENTS

- Improved operational efficiency across logistics workflows
- Reduced production issues through better state and API handling
- Contributed to scalable cross-platform mobile architectures
- Enhanced app reliability and performance across both Flutter and iOS platforms.
- Improved app startup time / responsiveness via codebase optimization and refactoring
- Increased feature delivery consistency by standardizing architecture within Flutter Core Team

EDUCATION

Bachelor's Degree in Computer Science

Institut Teknologi Sepuluh Nopember - GPA: 3.81 / 4.0

ADDITIONAL INFORMATION

Languages : Indonesian (Native), English (Professional)

Focus : Scalable systems, performance optimization, operational excellence
